PREVENTION IS BETTER THAN CURE :

When you really want to hit someone ,do it and say MOSQUITO.

Dengue is the mosquito born vital disease spreading its tentacles all over the world .Dengue constitutes for major death in children. According to WHO globally it was estimated that 70 to 100 million people are infected every year . SCAD World school conducted a dengue awareness program for the welfare of the students . Mr. Shanmuganathan ,Block health supervisor Palladam and Mrs. Tamil Selvi Health inspector ,Primary Health Centre, Puliampatti were the chief guest of the program .

He spoke about the characteristics of the Aedes Mosquito and the gave a clear study about the symptoms of the dengue fever and the precautions to be taken for prevention .It was a interaction session and all the students and teachers clarified their doubts by asking complicated questions .

Nilavembu kudineer is widely used in Siddha medicine to combat, prevent and manage of all type of viral infections and fever .All the children, teachers and non teaching staff were given Nilayembu extract .

The session duration was 1 hour and it extended for more than an hour. The students and teachers understood that they should wake up healthy and face the fears and wipe their tears.

Our teachers also organized an awareness programme to the students on the same day where they explored the various causes of dengue fever and protective measure to avoid it .
